Among the four classes of unaccusative verbs recognized by Levin and Rappaport-Hovav (1995), verbs of existence, verbs of appearance, verbs of inherently directed motion, and verbs of change-of-state, the verbs of change-of-state “figure most prominently in the causative alternation”, an alternation between pairs of underived verbs (Levin and Rappaport-Hovav 1994). In their 1995 monograph on the topic of unaccusativity, they argue for:

a fundamental division within the class of unaccusative verbs that is motivated with respect to the causative alternation…(V)erbs of existence and verbs of appearance [and presumably verbs of inherently directed motion MV], although bona fide unaccusatives, do not participate in the causative alternation. This property is not characteristic of only English, but is typical of a variety of languages (1995: 119).

We claim that in Japanese all four unaccusative classes participate in the causative alternation. If correct, a major claim of Levin and Rappaport-Hovav 1995, that for change-of-state verbs, the intransitive usage is derived from the more basic transitive one through “de-transitivizing”, becomes difficult to maintain.

A. Change-of-state

(1) a. The chair broke
   b. Isu-ga kow-are-ta.
      Chair-NOM break-INTRANS-PAST

(2) a. The gorilla broke the chair.
   b. Gorira-ga isu-o kow-ashi-ta.
      Gorilla-NOM chair-ACC break-TRANS-PAST

B. Appearance

   b. Eizō-ga gamen-ni araw-are-ta.
      Picture-NOM screen-LOC appear-INTRANS-PAST

(4) a. *The programmer appeared a picture on the screen.
   b. Purogurama-ga gamen-ni eizō-o araw-ashi-ta.
      Programmer-NOM screen-LOC picture-ACC appear-TRANS-PAST
C. Existence

(5) a. One hundred million yen remained in the bank account.
      100 million yen-NOM bank account-LOC remain-INTRANS-PAST

       Father-NOM bank account-LOC 100 million yen-ACC remain-TRANS-PAST

D. Inherently Directed Motion

(7) a. The ship arrived at the Port of Hakata.
    b. Fune-ga Hakata fūtō-ni tsui-ta.
       Ship-NOM Hakata Port-GOAL arrive-INTRANS-PAST

(8) a. *The captain arrived the ship at the Port of Hakata.
       captain-NOM Hakata Port-GOAL ship-ACC arrive-TRANS-PAST

Examples (1)-(8) show that while only the change-of-state verbs participate in the
English causative alternations, all four classes participate in Japanese. These are genuine
examples of the causative alternation in Japanese since, as is the case for unaccusative verbs
cross-linguistically, we find that the Subjects of the intransitives (marked by the postposition
– ga in the odd numbered b) examples) are the Direct Objects (marked by – o in the even
numbered b) examples) of the transitives. Additionally, the Japanese transitive verbs are all
lexical causatives as further evidenced by their ability to undergo morphological
causativization, e.g. kowasu (‘to break’ transitive) → kowasaseru (‘to make break’),
arawasu (‘to show’) → arawasaseru (‘to make show’), nokosu (‘to leave’) → nokosaseru (‘to make
leave’) tsukeru (‘to attach’) → tsukesaseru (‘to make attach’).
